Care in Motion.

Mobile functional furniture for the healthcare sector

Catalogue valid from 2020

novocal – care in motion.

As a manufacturer of functional mobile furniture for Health Care, it is our desire to optimize and simplify the working life of nursing staff in hospitals, nursing care and retirement homes. Naturally, your patients are at the centre of your business, and our products allow staff to move from location to location quickly, smoothly and efficiently maximizing your care potential and reducing stress.

We are a technically broad and experienced team based in Ostrhauderfehn in the North of Germany. As a customer you will receive all your bespoke service needs from a single source: advice and quoting, processing and production as well as delivery and instruction.

All our products are made according to individual requirements with service, quality and fine detail our top priority.

Our product range includes functional furniture in the field of laundry logistics and waste management as well as general and special care trolleys, e.g. MRSA, endoscopy or module trolleys. In addition, we also offer all kinds of transport equipment, storage systems and components for sterile surgical areas. Numerous accessories are available to customize your products to suit your individual needs.

Within this catalogue you will find examples of both our wide ranging and individual assortment of products. If you have any special requests or enquiries, please do not hesitate to contact us. We will happily find a solution to any of your requirements. Our customers trust in us to deliver our promises.

Together we can set care in motion.

Our promise:
Everything from a single source.
Reliable, sustainable, individual.
Your Novocal team

NW81
Series Compact Plus

„Compact“ and „Compact Plus“

These linen collectors are distinguished by their compact and shapely design. The construction is designed to protect your walls from damage by utilising hinged lids.

Our linen collectors are available as 1-fold to 5-fold collectors. Various arrangements are possible.

The linen collectors all consist of:

- a buffed stainless steel frame
- continuously welded pipe joints
- 4 castor wheels Ø 75 mm, with 2 brakes
- adhesive ring SR400
- various accessories available
- also available as wall-mounted collector or add-on for our laundry trolleys

Our linen collector Compact Plus is additionally equipped with:

- push bar
- 4 bumper discs

Further accessories for our linen collectors can be found on page 16.

Custom made products are possible. Please contact us to plan an individual solution for your purpose.

Combination Collectors for Linen and Waste

This collector series is a combination of our stainless steel waste collector „Genius“ KS70 (see page 82) and various linen collectors from the series „Compact Plus“.

The clamping ring of the KS70 is operated by a foot pedal for ease of use and hygiene.

The adhesive ring of the linen collectors can be equipped with hinged lids and opening pedals.

The waste collectors are equipped as follows:

- adhesive ring SR400
- synthetic base tub
- 4 bumper discs
- 4 castor wheels Ø 75mm, with 2 brakes

Textile Linen Bags

The novocal textile linen bags, which are self-opening during the washing process, are made of a high quality polyester fabric. The high quality polyester-fabric brin can be washed at the highest temperatures and offers a long lifespan.

A special dye and thermo-fixation prevent the colours from fading as well as the material from shrinking.

All novocal linen bags comply with legal directives and guidelines issued by the German Health Authorities and relevant professional associations.

- self-opening and fitted with a toggle
- textile quality: 100% Polyester
- Content: approx. 12kg linen
- areal weight: 220g/sq m

TW1 - base colour white, 2 horizontal coloured stripes
Selectable colours: red, yellow, blue, green, brown, grey, orange or without stripes

TW2 - fully coloured, 2 horizontal coloured stripes
Selectable colours: red, yellow, blue, green, grey, brown and orange

Our goal is to provide you products and solutions that meet the latest design, technology and functional requirements. Therefore, we have different processes to improve our products.

As part of these processes, there are optimizations as well as modifications or changes in production that are relevant to your products.

Product changes are a sign of improvement and advancing manufacturing, but may cause variations in color, style and texture of the products.

Errors and omissions excepted.
