Mobile functional furniture for the healthcare sector

Catalogue valid from 2020

novocal – care in motion.

As a manufacturer of functional mobile furniture for Health Care, it is our desire to optimize and simplify the working life of nursing staff in hospitals, nursing care and retirement homes. Naturally, your patients are at the centre of your business, and our products allow staff to move from location to location quickly, smoothly and efficiently maximizing your care potential and reducing stress.

We are a technically broad and experienced team based in Ostrhauderfehn in the North of Germany. As a customer you will receive all your bespoke service needs from a single source: advice and quoting, processing and production as well as delivery and instruction.

All our products are made according to individual requirements with service, quality and fine detail our top priority.

Our product range includes functional furniture in the field of laundry logistics and waste management as well as general and special care trolleys, e.g. MRSA, endoscopy or module trolleys. In addition, we also offer all kinds of transport equipment, storage systems and components for sterile surgical areas. Numerous accessories are available to customize your products to suit your individual needs.

Within this catalogue you will find examples of both our wide ranging and individual assortment of products. If you have any special requests or enquiries, please do not hesitate to contact us. We will happily find a solution to any of your requirements. Our customers trust in us to deliver our promises.

Together we can set care in motion.

Our promise:
Everything from a single source.
Reliable, sustainable, individual.
Your Novocal team

Patient Care and Nursing Trolleys PAW
Our patient care and nursing trolleys series PAW3000 to PAW9000 allow the flexible use in all areas of patient care and nursing. From a multitude of combination possibilities you will find examples of each series' models on the following pages. Like our laundry trolleys, our patient care and nursing trolleys are available in various colours.

Cabinet and fascia colour can be chosen individually.

Undercarriage
The undercarriage is made up of a solid plastic sheet, which also serves as wall-stopper. Four castor wheels (from PAW6000 up with five castor wheels) Ø 125 mm, with two brakes, guarantee easy use.

Cabinet
The cabinet consists of special high quality sheets and worktops of quality class E1 with a double-sided melamine resin coating and a two mm thick ABS-safety edge foil.

Working Surface
As standard, all patient care and nursing trolleys have a working surface with rounded edges. The soft-drawers run on telescopic slides, which have a self-closing function.

The storage shelves are adjustable in height and can be taken out completely.

Standard colour: light grey (LG)
Edge veneer: light grey (LG)
Special colours on request.

Accessories
- stainless steel gallery
- ABS top
- divider for drawers
- functional tracks/rails
- mounting for bins
- fold-away working surface
- girder support system for modules

The complete overview of accessories available for our patient care and nursing trolleys can be found on pages 71-80.

It would be our pleasure to be your consultant and offer you a customised proposal based on your specific needs.

Medicine Trolleys

The medicine trolleys enable a flexible transport as well as an organised storage of all drugs.
The undercarriage is made up of a solid plastic sheet, which also serves as wall-stopper. The cabinet consists of special high quality sheets and worktops of quality class E1 with a double-sided melamine resin coating and a two mm thick ABS-safety edge foil.
Moreover, the MEDI5001 features one hinged folding door with door holder central and magnet at the undercarriage. Four castor wheels, Ø 125 mm, two with brakes, allow easy handling. The trolley is equipped with an electronic locking system.

The interior is made up as follows:
- 1 extractable shelf
- 5 fully extendible drawer runners with ISO modules format 450 x 400 x 100 mm incl. 3 dividers 400 x 100 mm and 2 dividers 450 x 100 mm
- 20 indicator plates

The trolley features the following standard exterior:
- 1 push bar
- 1 fold away writing surface on the right side 350 x 480 mm
- 1 waste bin 15 Litre with stainless steel mounting
- 1 F-mounting on the right side of the back

The medicine trolley MEDI6002 is constructed as follows:
- 1 push bar
- 2 doors incl. cylindrical lock
- 4 compartments in the doors
- in the cabinet stainless steel rails for 36 Trays (variable for 4-fold or 6-fold trays)

Accessories for Medicine Trolleys

Blister box (BLB)

ABS-Top (ABSTOP) for the top work- and writing surface incl. three-sided edge

The fold-away working surface **(SPA1)** (350 x 470 mm) can be operated with one hand. It is robust and the usage is easy.

The **push bar (BSL)** guarantees high usability. For a quick and hygienic waste disposal a **waste collector for 15 liters (KB15-E)** is mounted standardly.

The **electronical numeric code pad (BSML)** avoids unauthorised access to drugs and nursing materials. The MEDI6002 is locked by two **cylindrical locks (ZY)**.

The trolleys are equipped with an **F-mounting (FHL/FHR)** incl. **a stainless steel mounting (MBH) for mediboxes (MB).**

MOD6300K

Module Trolley Series MOD6000

Our modern module trolleys are ergonomically designed and built in a user-friendly manner. They are equipped with fully extendible drawer runners for easy insertion and removal of ISO modules or wire-netted baskets. This series can be equipped with modules or baskets with heights of 50 mm, 100 mm or 200 mm (baskets 180 mm). Modules and baskets can be found from page 44 onwards. You can choose from pull-out blinds, 270 degrees swing-out doors or fully retractable hinged doors.

The cabinet is made of high quality special sheets, quality class E1 with double-sided melamine resin coating and a two mm thick ABS-safety edge foil. It is available in two heights with various colour schemes, according to our colour chart on page 10.

The working surface has rounded edges. The undercarriage is made up of a solid plastic sheet, which also serves as wall-stopper. Silent and easy movement is guaranteed by four castor wheels Ø 125mm, with two brakes. A stainless steel push bar is included. All drawers are equipped with recessed handles.

ISO Modules and Wire-Netted Baskets

Our ISO modules and wire-netted baskets are made to transport and store a big variety of materials in our ward-round or module trolleys. All modules are available in different heights for use with our module girder support system or our module trolleys as well as an entire or half module (see image on the left).

All ISO modules come in grey colour (ABS - Acrylonitrile-Butadiene-Styrene copolymers) and transparent (PC - polycarbonate). The wire-netted baskets are white and rilsan coated. All modules are divisible and equipped with an integrated stopping device. Dividers for ABS, PC and GK are available in all relevant sizes.

The ABS and PC modules are tiltable (32°). This makes it easier to view and access contents. The wire-netted baskets do not have this option.

Patient Trolley

PATW8301

The patient trolley simplifies everyday processes concerning the security and storage of a patient's property. The left side the trolley provides hanging space for clothes, and includes a soft closing, 180 degree hinged door.

Three drawers are located on the right side which can be accessed from either side of the trolley to reduce unnecessary movement of the unit. The top drawer is equipped with a combination lock for security of a patients valuables, with a further two drawers below providing a variety of storage sizes. All drawers can be loaded with up to 35 kilos in weight

A height adjustable dinner tray is provided between two wooden upstands to the right side.

The cabinet consist of class E1 high quality sheets and worktops with a double-sided melamine resin coating and a two mm thick ABS-safety edge foil.

A special edge creates a seamless joint providing very hygienic, and easy to clean work surfaces to assist in maintaining a sterile environment. There is also a bottle storage facility on the worktop for a variety of uses.

The trolley base is made up of a solid plastic sheet, which also serves as a buffer for the unit to prevent damage, and is provided with five high quality 125 mm castor wheels with two brakes for guaranteed secure, easy, and silent use.

The trolley is equipped with a euro-rack which can be used to push the trolley.

iPad Trolley

Our iPad Trolley is an ergonomically formed ward round trolley which has a slanted working surface with an integrated iPad. The working surface is easily cleaned, and the equipment kept safe from any humidity entering. The iPad is locked away securely by a lock attached to the side of the trolley.

An integrated additional battery with 12.000 mAh adds up to 12 additional hours of battery life for working on the iPad. In this manner several duty shifts can be completed successfully using the iPad.

The undercarriage is made up of a solid plastic sheet. Four castor wheels Ø 125mm, with two brakes, guarantee easy use.

The bottom part of the trolley can be equipped with drawers, compartments, regular doors or foldable doors

Power Supply System

Our power supply system consists of a base unit, an external control and display panel, all connection cables and an appropriate battery. The battery is available in different versions to suit your needs. Please contact us for available options.

This unit generates the required charge current while providing enough capacity for your IT unit. Load module is included.

With this battery solution you are able to work independently in your facility for hours. The control unit provides a visual and audible alarm for low battery level.

Charging can occur at any time via the corresponding charger cable. There is no interruption of power supply, which means that you can work more flexibly than ever. This system can be integrated into a wide range of our patient care and nursing trolleys.

The PSS is available for all computer and laptop trolleys and can also be retrofitted into existing trolleys

Further accessories can be found from page 71.

Disinfection station DESI

Virus infections are becoming more and more frequent. As preventive measure doctors and health experts recommend washing your hands regularly. However, this is not always possible due to lack of facilities.

Our disinfection station DESI can be used any time, any place and offers the perfect prerequisites for disinfection of hands. Protect yourself and your fellow people everywhere!

The disinfection station DESI is built of stainless steel.

You can add different accessories e.g. disinfectant dispenser (manual or automatic), drip pan or information/instruction labels to the stainless steel plate.

DMS5A
incl. TS

It is also possible to add wire-netted baskets - either welded to the station or to be mounted with hooks.

The DESI is available in two versions:

DESI1 refers to the mobile Version with four castor wheels, diameter 50 mm, two with brakes.

DESI2 refers to the floor model.

Article Number	Total Dimensions BxDxH mm
DESI1	405 x 436 x 1425
DESI2	385 x 420 x 1350

Disinfection Centre DESICENTER

The disinfection center DESICENTER is attractive, modern and practical. The center is stable, nevertheless it is easy to use and applicable in various areas. Especially in areas where hygiene is very important, e.g. foyers in hospitals, retirement homes or doctors' offices.

The DESICENTER is available in polished stainless steel (DESICENTER-VA) as well as coloured and powder coated (DESICENTER-F). Choosable colours are: white, yellow, orange, red, green and blue.

The DESICENTER will not tilt over. It is mounted on a solid ground plate with skid-proof rubber feet. On request, two additional wheels for transportation can be mounted.

Mobile 360° Sterilization Unit with UV-C Technology- up to 99,999% Sterility

Without chemicals and without toxic compounds: The UV-C sterilization unit sterilizes all kinds of microbes in patients' room, operation rooms or other areas in hospitals and retirement homes which are contaminated.

Ultraviolet radiation has a disinfecting effect in the spectral range between 280 and 200 nm. The device makes use of this advantage and eliminates germs at 254 nm without ozone formation. Of course, all requirements for consumer protection and HACCP concepts are met.

UEKG01

UEKG01
control unit

The exact Dose makes the Difference!

Small microorganisms are eliminated by a small dose of UV-C radiation. More complexly structured microbes require a higher dose of UV-C radiation to be eliminated. The high-energy radiation of the UV-C disinfection device sterilizes up to 99.999% of all germs on the most diverse surfaces, such as door handles, bed frames, mattresses, tables or telephone handsets, if the device is correctly placed in the room.

All Advantages at a Glance:

- comprehensive disinfection without the use of chemicals
- 360° sterilization by 8 UV-C emitters
- very economical
- user-friendly operation, cleaning and maintenance
- compact size, mobile and therefore easy to transport within all hospital areas
- low energy consumption
- safe shutdown
- short operating times of 5 to 20 minutes
- Lifetime UV-C lamp: 12,000 h
- optimal supplement to standard cleaning procedures, suitable for all surfaces such as e.g. mattresses, tables and chairs

The sensor range of the UV-C device is 4.2 meters:

UEKG01	532 x 532 x 1726

MRSA Trolley, Series 1

MRSA Trolley: MRSA1

The MRSA1 trolley matches all requirements related to hygienic management. The trolley has an extended back to mount various accessories, e.g. disinfectant dispenser, drip pan or glove box.

The undercarriage is made up of a solid plastic sheet, which also serves as wall-stopper. The cabinet consists of special high quality sheets and worktops of quality class E1 with double-sided melamine resin coating and a two mm thick ABS-safety edge foil. Four castor wheels Ø 125 mm, two with brakes, guarantee easy use.

There are two versions available:

- MRSA1F with two height adjustable shelves
- MRSA1M with girder support for ISO-modules format:

MRSA1M

MRSA1F
Image with optional accessories DMS5, HSB1 and TEXT-MRSA

Cabinet Dimensions	Total Dimensions BxDxH mm
360 x 490 x 745	440 x 570 x 1660

MRSA Trolley: MRSA2

The MRSA2 trolley matches all requirements related to hygienic management. The trolley has an extended open back to mount various accessories, e.g. disinfectant dispenser, drip pan or glove box.

The undercarriage is made up of a solid plastic sheet, which also serves as wall-stopper. The cabinet consists of special high quality sheets and worktops of quality class E1 with double-sided melamine resin coating and a two mm thick ABS-safety edge foil. Four castor wheels Ø 125 mm, two with brakes, guarantee easy use.

There are two versions available:

- MRSA2F with two height adjustable shelves
- MRSA2M with girder support for ISO-modules format:

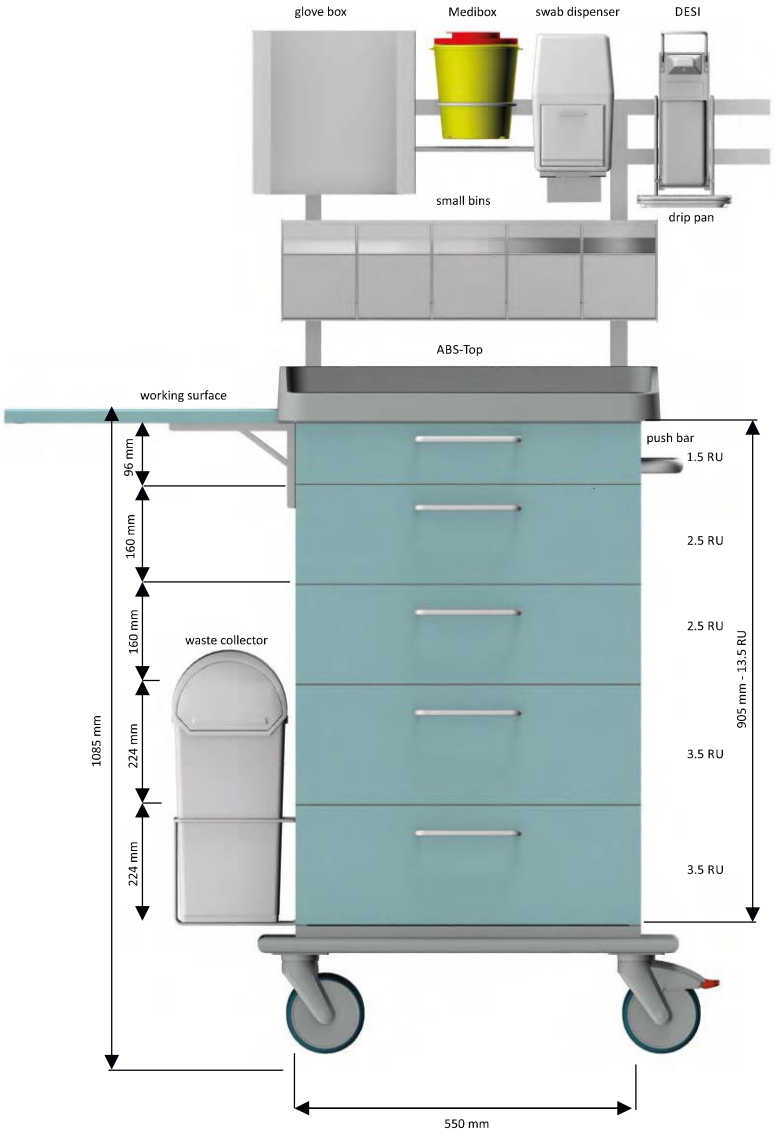
Cabinet Dimensions	Total Dimensions BxDxH mm
360 x 490 x 745	440 x 570 x 1485



The pictured trolley is equipped with the following accessories:

- SPA1 (fold-away working surface)
- KB15 (waste collector/bin)
- ABS-TOP 5000
- BS (push bar)
- ES2 (euro-rack 2-fold, double-row)
- SCHUETTE5 (5 small bins)
- HSB2PAW (glove box 2-fold, euro-rack model)
- MB (medibox)
- TSE (dab dispenser, euro-rack model)
- DSM5PAW (disinfectant dispenser, 500 ml, euro-rack model)
- TS5PAW (drip pan, euro-rack model)

You will find suitable accessories for your laundry trolleys, IT trolleys and patient care and nursing trolleys on the following pages. It would be our pleasure to offer you a customised proposal based on your specific needs.

SPA1
sideways fold-away working surface
for installation on the left or right,
operation with one hand, optionally with stainless steel plating

SPA1H
sideways height-adjustable working surface
SPA1H for installation on the left or right,
operation with two hands, optionally with stainless steel plating.

SPA2
extendable writing surface

EAK
Stainless steel plating
satin stainless steel, for the top work- and writing surface

SF
Side compartments
with stainless steel
frame grid for
SW600
and SW700

MTW
Girder support systems
for ISO modules
On request, available in
different sizes for your
nursing trolleys.

QTS, LTS, RLS
Divider for drawers
LTS - lengthwise, made of aluminium, different sizes available
QTS - transverse, transparent, different sizes available
RL - slotted rail holder, fixed by glue, different sizes available

BS
Push bar
BS4L/BS4R: push bar left / right for cabinet depth 490 mm
BS6L/BS6R: push bar left / right for cabinet depth 600 mm

TSE
Swab dispenser
euro-rack model

IAB
Surgical instrument container
including stainless steel fitting

MB
Medibox, also called septobox or hallow needle box,
made of polypropylene, yellow with red closing lid
1.5 l for used hollow needles, scalpels, etc.
The box can be easily closed secure and watertight.

MBHS
Medibox mounting (set)
available in different sizes,
mounting as set,
including 10 boxes of 1.5 l each

MBHES
Medibox mounting
euro-rack model
Custom-made sizes and forms on
request.

Accessories

DMS
Disinfectant dispenser for 500 ml or 1000 ml,
stainless steel lever for hand and elbow operation,
aluminum body, mat silver anodised,
to the front removable stainless steel pump with dosing limitation,
available as euro-rack model (PAW), clip-on tubular model (SW) and wall model (W)
The pump made of stainless steel (EPD) is also available separately.

DMS5HH
Mounting for disinfectant dispenser, retrofit
for existing euro-rack,
for flexible mounting at the bottom or at the top

DMS5RR
Disinfectant dispenser
for round tube Ø 22-35 mm

DMSA
automatic, with sensor
(spare pump for pump exchange available)

TS
Drip pan for DMS5 and DMS10,
available as euro-rack model (PAW), tubular model (SW) and wall model (W) as well as a special model for DESI available

EPD
Stainless steel pump
with dosing limitation

DMSV5 / DMSV10
Disinfectant closure plate
DMSV5: for 500 ml DMS
DMSV10: for 1000 ml DMS

Article Number	Disinfectant Dispenser
DMS5A	automatic DMS with sensor 500 ml
DMS5PAW	euro-rack model 500 m

HSB4W (not shown)**/HSB4QW**	134 x 92 x 520/960 x 85 x 130

SCHUETTE3 - SCHUETTE6
Bins 3-6-fold, for mounting to the euro-rack

SCHUETTE3FIFO / SCHUETTE5FIFO
Bins with FIFO-principle: First In - First Out
3-fold and 5-fold

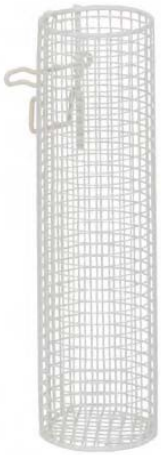
GK
wire-netted basket, for mounting sideways on PAW
BxDxH = 400 x 160 x 170 mm

PHE / PHK
Coat hooks for mounting at back wall, available in stainless steel and plastic

PHE - stainless steel **PHK** - plastic

NRS01
Stainless steel kidney dish for euro-rack

KKR
Catheter tube round, wire netted, PE white
KKR01 - height 335 mm, Ø 85 mm
KKR02 -height 480 mm, Ø 100 mm



KKE
Catheter tube square stainless steel wire
KKE01 - 90 x 90 x 350 mm
KKED01 - central divider, 150 x 100 x 480 mm
KKED02 - central divider, 150 x 100 x 280 mm

MUBH
Mounting for mouth protection box to be mounted to euro-rack **(MUBHES)** special sizes on request

KB9
synthetic waste bin
9 Liters for SW and PAW
KB9-E - including stainless steel mounting

KB15
synthetic waste bin
15 Liters for SW and PAW
KB15-E - including stainless steel mounting

KB8A
automatic sensor waste bin
8 Liters for SW and PAW
KB8A-E - including stainless steel mounting

SLIDE15 / SLIDE25
Waste bin 15 or 25 liters with knee operation
colour: powdered RAL 7035 light grey
dimensions: 460 x 400 x 170 mm / dimensions: 420 x 570 x 210 mm

SLIDE15E / SLIDE25E
Waste bin 15 or 25 liters, stainless steel, with knee operation
dimensions: 460 x 400 x 170 mm / dimensions: 420 x 570 x 210 mm

ZY
Cylindrical lock

ZS
Combination lock
version depending on the product

TPS01
Transponder lock
compact and cable free furniture lock for all cabinets and drawers. Can be used without a key.

BSML
B-Smart-Lock
electronic numeric code pad

ZE
Central lock

IPH001
iPad mounting
wall mounting

MH
Monitor mounting

TH	T-mounting
TK	transport box, diff. vers.
TPS01	transponder lock
TRE	stainless steel transport trolley, diff. vers.
TRE-AP	hinged shelf for TRE
TS	drip pan, diff. vers.
TSE	swab dispender
TVD	pedal with dumping function, diff. vers.
TW1/TW2	linen bag, diff. vers.
UF	urine bottles wall wounting, diff. vers.
UTBES	implement basket
WKK	waste collector with colored synthetic container
WW1/WW2	stainless steel undercarriage with plastic tube
WW	baby changing trolley, diff. vers.
WICKELAUFLAGE	baby's changing pad, diff. vers.
WSR	shoe rack for wall mounting
WSU	stainless steel wall shelf
WTW	linen bag, diff. vers.
ZE	cenrtal lock
ZFS	master adjusting device
ZS	combination lock
ZSE	room recyclable Collector, diff. vers.
ZY	cylindrical lock

Our goal is to provide you products and solutions that meet the latest design, technology and functional requirements. Therefore, we have different processes to improve our products.

As part of these processes, there are optimizations as well as modifications or changes in production that are relevant to your products.

Product changes are a sign of improvement and advancing manufacturing, but may cause variations in color, style and texture of the products.

Errors and omissions excepted.
