

## Drawer organization

If you have a cabinet with drawers that are messy and need better organization, we have the solution for you — in fact, four different solutions. Suitable for every width, every depth, and every height.

**1. Divider system with glued end fastenings.** Suitable for drawers with straight and smooth end or side walls. The aluminum dividers are adjustable in 1 cm increments and can be fitted with the required number of sliding cross dividers.

**2. Plastic frame with sliding dividers.** A convenient solution if the drawer needs to be cleaned frequently — the module can be removed from the drawer with a single movement.

**3. Aluminum frame with sliding dividers.** A durable solution suitable for larger drawers; can be easily removed when needed.

**4. Plastic module (tray) with sliding dividers.** Can be removed from the drawer together with all the items placed on the tray. Available in different sizes.

Standard drawer interior solutions are presented on the product sheet. Based on these solutions, it is possible to manufacture customized solutions according to the customer's wishes and dimensions.
